

ENSURE OPTIMAL PERFORMANCE WITH PROPSPEED®

The best foul-release coating for
Running gear - Underwater metals - Niche areas - Transducers

A COMMERCIAL KIT, FOR COMMERCIAL OPERATORS

The Propspeed Commercial Kit has been created specifically for the commercial marine professional. Propspeed is a two-part coating system that features an exceptionally strong chemical and mechanical bond between the metal substrate, the Etching Primer, and the Clear Coat. The Etching Primer is known for its iconic gold colour, tenacious adhesion to metal substrates and superior corrosion resistance. The Clear Coat provides a super slick surface that marine growth cannot adhere to. Combined, they form a system that is **unrivalled in performance, supporting operational readiness and ensuring that your vessel can run at its peak** throughout the seasons.

IN THE KIT

Product code: **PSCKIT**

- 1x 500ml Propprep
- 2x 960ml Etching Primer Base
- 2x 240ml Etching Primer Hardener
- 1x 1280ml Clear Coat
- 2x stirring sticks

Surface Coverage:
1x Kit = 14.2m² / 153ft²

The Propspeed system is suitable for use on propellers, shafts, rudders, struts, keel coolers, pod drives, thrusters, fire suppression pumps, and any other underwater metal surface.

ULTIMATE PROTECTION AGAINST MARINE GROWTH & CORROSION

Propspeed is the **original foul-release coating**, recognised globally as the best solution to prevent marine growth on running gear and all underwater metals. Our super slick coating system **saves time and money** through increased efficiency and reduced maintenance costs. Propspeed also **reduces the risk of corrosion** by electrically isolating the metal, as well as limiting the exchanges of ions and the gases contained in the water (electrolyte) and the metal. In short, if a reaction can't occur, there will be no corrosion!

ALL-IN-ONE PROTECTION

Defence against both **marine growth**, and **corrosion** for all underwater metal assets.

SUPERIOR ADHESION TO METAL

Strong long-lasting adhesion to metals that makes Propspeed unparalleled to other products on the market.

OPERATIONAL READINESS

Propspeed keeps underwater metals free from marine growth, ensuring that your **vessel can run at its peak** throughout the entire season.

REDUCE COST & SAVE FUEL

Our super slick coating system saves time and money through **increased efficiency** and **reduced maintenance costs**.

STOP THE TRANSFER OF INVASIVE SPECIES

Growth releases when the vessel reaches cruising speed, **preventing invasive species** from being transferred to other regions.

Proven performance worldwide:

“The benefits of Propspeed are definitely noticeable in terms of a much cleaner propeller when we haul the vessel for survey, maintenance and repairs. Application of Propspeed has now become a must-do job at all haul outs.”

- Andrew Stark, CEO, Ocean Fisheries

“Before using Propspeed, we had as much as 4 inches (10cm) of growth on the propeller shaft. With Propspeed applied, our running gear is now free of growth.”

- Captain Rick Gauron, Yankee Freedom III

PROPSPEED® Commercial

Peak Performance, Superior Protection & Cost Reduction

Propspeed® is dedicated to developing products that make marine craft more efficient and economical to run and maintain. We proudly manufacture and distribute Propspeed, Lightspeed™ and Foulfree™, foul-release coatings trusted by commercial operators, fleet managers and captains worldwide. Prevent surface fouling below the waterline and enjoy improved performance and hassle-free maintenance. Propspeed has been protecting underwater assets for over 21 years and has built a passionate team to offer superior in-field technical support.
